Sidra Alsayed

FULL-STACK DEVELOPER | DJANGO & REACT

Damascus, Syria | (+963) 947 158 561 | sidrasayed86@gmail.com
LinkedIn | GitHub | Behance

PROFESSIONAL SUMMARY

Full-Stack Developer specializing in scalable web applications using Django, React, and relational databases. Experienced in REST APIs, authentication and role-based access, responsive dashboards, AI-powered features, background processing, and Docker-based environments. Brings a strong UI/UX foundation to deliver maintainable products that are both functional and intuitive.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework, REST APIs

Frontend: React, JavaScript, HTML5, CSS3, Material UI

Mobile: Flutter, Dart, Riverpod

Databases: PostgreSQL, MySQL

Automation & Infrastructure: n8n, Docker, Docker Compose, Git, GitHub, Bash

AI Integration: RAG, LLM integration, document processing, Whisper

Integrations: Shopify Admin API

Design Foundation: Figma, Adobe XD, wireframing, prototyping

PROFESSIONAL EXPERIENCE

Full-Stack Developer - Freelance

2026 - Present | Remote

- Develop end-to-end web applications with Django, Django REST Framework, React, PostgreSQL, and MySQL.
- Build REST APIs, authentication, role-based permissions, dashboards, and CRUD workflows.
- Integrate AI services and third-party APIs, and containerize applications with Docker Compose.
- Also develop cross-platform mobile apps with Flutter, including offline-first sync and full localization, when a project calls for a native experience.
- Translate client requirements into responsive, maintainable solutions across frontend and backend layers.

Workflow Automation Trainee - beIN MEDIA

Jun 2026 - Jul 2026

- Completed hands-on training in workflow automation using n8n.
- Built multi-step workflows using triggers, webhooks, API integrations, data transformation, and automated notifications.

SELECTED FULL-STACK & AI PROJECTS

Control — AI Shopping Assistant & Shopify Integration

EMBEDDABLE AI WIDGET + MERCHANT DASHBOARD

- Built an embeddable JavaScript chat widget (Shadow DOM isolation) that any e-commerce site can add with a single script tag.
- Implemented an LLM-powered assistant (Anthropic/OpenAI/Gemini) that understands customer intent and recommends a matching product from the merchant's catalog.
- Added a virtual try-on feature that generates a realistic image of the customer wearing the recommended product.
- Built a Django admin dashboard for per-merchant API tokens, usage quotas, and catalog management.
- Implemented live Shopify catalog sync via the Admin API and webhooks, keeping merchant inventory current automatically with no manual upload.

Tech: Django, DRF, JavaScript, PostgreSQL, Anthropic/OpenAI/Gemini APIs, Shopify Admin API

Vocalys

AI-POWERED FULL-STACK PLATFORM

- Developed a platform for uploading, processing, reviewing, and reporting customer-service calls.
- Built Django REST APIs, JWT authentication, and role-based workflows for QA and Manager users.
- Created a React dashboard for analytics, follow-up tasks, reports, and real-time notifications.
- Integrated transcription, sentiment analysis, priority classification, keyword extraction, and AI-generated reports.
- Implemented background jobs and live status updates with Celery, Redis, Channels, and WebSockets.

Tech: Django 5, DRF, React 19, PostgreSQL, Celery, Redis, Channels, FastAPI, Whisper, Docker

GitHub: github.com/sidra221/call-analysis

Learnix

EDUCATIONAL AI APPLICATION

- Developed an educational system that processes books and converts their content into interactive learning material.
- Applied AI-based document analysis to generate context-aware questions and quizzes from book content.
- Built workflows for managing source material, generated assessments, answers, and learning results.

Tech: Python, AI/LLM Integration, Document Processing

Hospital Management System

FULL-STACK WEB APPLICATION

- Developed modules for patient records, appointments, staff management, and role-based access.
- Implemented Django APIs, relational data models, and React components supporting CRUD workflows.

Tech: Django, React, PostgreSQL

GitHub: github.com/sidra221/hospital

SmartTelecomRAG

AI-POWERED CUSTOMER SUPPORT CHATBOT

- Built a telecom support chatbot using Retrieval-Augmented Generation and vector search.
- Implemented document retrieval for relevant responses and delivered an interactive Gradio interface.

Tech: Python, LlamaIndex, Qdrant, Gradio

GitHub: github.com/sidra221/SmartTelecomRAG

ADDITIONAL PRODUCT & UI/UX EXPERIENCE

UI/UX Designer - Pintours

May 2025 - May 2026 | United States, Remote

- Lead web and mobile interface redesigns and collaborate with developers on scalable, implementation-ready solutions.

UI/UX Designer - Amescom

Sep 2024 - Mar 2025 | Damascus, Syria

- Improve interaction flows and align designs with content-management systems and existing technical architecture.

UI/UX Designer - Newline

Mar 2024 - Aug 2024 | Dubai, UAE, Remote

- Translated client requirements and competitor research into responsive, implementation-aware product solutions.

EDUCATION

B.E. in Computer and Automation Engineering

Damascus University | 2021 - 2026 | Damascus, Syria

COMMUNITY EXPERIENCE

Volunteer Web Platform Contributor - Ammrha Team

Dec 2023 - 2025 | Damascus, Syria

- Contribute to a web platform for volunteer and beneficiary data, including data structures and integration-aware user flows.

Online Design Program Instructor - Al-Sham Cultural Forum

Nov 2025 - Present | Remote

- Deliver practical design instruction to 30 students and mentor project work through structured critique.
